## INTERESTS

- Singing
- Cricket
- Listen music

## PROFESSIONAL EXPERIENCE

React js developer

Inexture Solution | 2023 - Present

### ● Dairy management system

- I have developed **Dairy management system** focused on admin panel.
- Implemented secure **login** and **logout** functionality with specific permission-based authentication.
- Admin have access about add category, products, users, orders, subscriptions. also implement the **crud operations** (add, update, delete, read)
- **Technologies** :- React, RTK query, Mantine UI, Formik, Zod, Mantine react table

### ● Learning Management System

- I have developed a **quiz management system**, which includes both **admin** and **client** panels.
- Users can easily sign up and log in to the site
- Admins can add questions and answers, assign marks per question, and manage various other settings.
- Clients can attempt quizzes provided by the admin, submit quiz papers, and receive marks after submission with automatic answer-checking.
- **Technologies:** Next.js, Mantine UI, Redux Toolkit, Formik, Yup.

### ● SSO Authentication System

- In this project, I created a **login** page with **forgot** and **reset password** functionality.
- I used **Next Auth** for login and forgot password to add JWT tokens in the cookies.
- **Technologies:** Next.js, Mantine UI, Zod, React Hook Form

### ● Other projects

- I have also created numerous projects such as expense management systems, music apps, weather apps, personal portfolios, internal organization management systems, and e-commerce platforms.
- **Technologies:** Mantine UI, Tailwind CSS, React, Redux Toolkit, etc...
